

Core Park Area - Pavilion, benches, picnic tables, fire pit, horseshoe pits, volleyball. Adjacent to sled hill/amphitheater which also overlooks softball.

Future Building Site - 2.16 acre site accommodates 5,000 sf footprint building and 46 parking spaces.

Softball with 200-foot outfield. Backstop only allows open lawn area for soccer, rugby etc.

Off-leash Dog Area - Use future building site as interim to test concept. Initially use signage and markers to indicate off-leash area. Provide dumpster and posts for poop bags. If the concept proves popular, provide fenced area using 4-foot tall fence wood/chainlink fence system, locate in optional areas A or B.

Half Pipe - Locate close to parking/drop-off and where visibility is high for better supervision. Use unuseable excavation to form slopes.

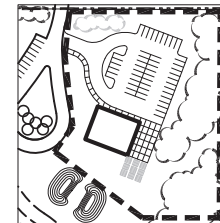

Natural Play Area - Include boulders and logs and ropes and related design elements to create balancing, climbing, hanging, strenghtening, agility, and similar events for ages 6-adult.

Loop Road - .43 miles, allows access deep into park, increases parking 50+ spaces, improves accessibility.

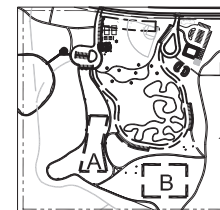

Pump Course - Narrow (2-3' wide) compacted earth trails for bicycles, approx. 1 mile. Include steep and windy segments with trails threaded through trees. Use existing exposed slopes in mined areas. Revegetate bare areas to stabilize slopes.

Lighted Loop Trail - Paved trail (2,220 lf) with lights and easy grades to accommodate people with limited mobility. Provide benches 200' apart+/- at scenic points to allow resting and viewing.

Picnic Areas - Selectively remove trees and brush to create open areas. seed with arasses. place picnic tables
